Pressed Plastic - Moyca Gort

Opening: 21. July 18.00 - 21.00

Workshop by Moyca: 12. August

- the art of making collages from waste material -

Moyca's work is characterised by the usage of elements such as material, shape, detail, print and color, which she extracts from objects she discovers in her surroundings. A significant source of inspiration for her are the things she encounters in her daily life, such as packaging and waste material. She continuously explores new methods of integrating these elements into her own work, which results in an unexpected image, surprising choice of material, bright colours and interesting layering and details. What fascinates her is how the meaning and function of an existing object can be transformed into a new image.

'Pressed Plastic' is an ongoing series of collages of found and carefully selected plastic bags, edited with markers. Each collage is unique, and all the frames have been sourced from thrifted stores, and granted a second life.

Artist: Moyca Gort
Worktitle: Green & G_reen
Measurements: 30,5 x 40,5 cm
Price: € 300,-
